

Student Instructions

Please obtain a history from Violet Blue, a 32-year-old woman who has a broken heart.

YOUR TASKS

- Take a focused history, including the history of present illness (HPI), relevant medical database, and related lifestyle factors.
- A comprehensive review of systems (ROS) is not necessary.

You will have **8 minutes** to complete these tasks. Afterwards, you will stay in the room for another 3 minutes to receive feedback from the observer and patient.
