

Medical Social Media

This list includes useful and interesting pages relating to medicine and medical education. The pages are from renowned Medical Journals, Institutions, Residency Programs, Physicians, and Training/Educational techniques and practices. Though only a few Twitter resource pages are listed here, students can find accomplished physician, institution, research, or residency pages from nearly every specialty on Twitter with little effort. Please note that these accounts are not endorsed by or connected with UW Medicine or UWSOM.

Important: Residency programs and educational pages for various specialties are numerous and often very informative about the program, as well as its research projects, patient interactions, and academic focuses. A rather comprehensive list for EM, Family, and Internal Residency pages can be found on the cite ALiEM under the search for “Residency Programs on Twitter and the following URL will pull up that page:

Figure 1 App: Free. Much like a Medical Instagram in which medical professionals from various parts of the world post cases with pictures and descriptions. Sometimes the cases are posted because a doctor, nurse, Paramedic, PA, etc. needs an expert opinion, and other cases are put up to illustrate certain pathologies, quiz students, or for other educational purposes.
