

Volunteer Opportunities

Medical students – we fully support your desire to be of service to others, however, please ensure that if you volunteer it doesn't distract you from your studies.

Public Health – Seattle & King County is developing their roster of volunteers (healthcare professionals and general support volunteers) who may be available in the coming weeks to assist in the COVID-19 response. A variety of needs exist depending on your specific skill sets and availability.

Public Health is looking for people who can help full and part time, including weekends. At this time, there is no option to work remotely; any assignment would be at a specified location. Training, insurance, parking and snacks/meals would be provided.

If you may be able to assist, please [click here](#) to complete their brief survey and provide your information. They will contact you if they have specific needs you can support.

UWMC Volunteer Opportunities

Screeners: They are in immediate need of screeners to watch hospital entrances and provide visitor guidance.

Dofficers: “Dofficers,” also known as “PPE Partners,” supports clinical staff exiting a room. The dofficer reads off a checklist while the clinician removes personal protective equipment (PPE). Please note: There is no patient contact in this role; dofficers will not enter patient rooms.

Environmental Services EVS: Housekeeping assistance in non-clinical areas: Lobby, offices, restrooms, waiting areas, removing garbage, vacuuming and other light, non-patient housekeeping tasks.

Transporter: Transporting patients from one area to another.

Data Entry: Data entry is needed for education services and employee health.

When you sign up for a volunteer position, please indicate if there is a role you cannot fill. Understand, you will not likely be assigned to a task that is your specialty. You do not need any prior experience; they are providing immediate job training. If you are a student, please ensure
