CBME Tracking Dashboard

Dashboard Contents

WBA Requirement Progress

This report defaults on the currently active standard clerkship rotations for your department.

The landing page provides a summary of student completion for the weekly and activity requirements in alignment with the COMPASS Clerkship grading policy.

The top of the page contains a quick reference to the number of students and number of clerkship rotations currently displayed for your department.

Table Calculations

The table is structured with requirement tracking at the beginning of the table followed by the summary for each of the required weeks and activities.

2026-2027 Patient Care Phase Clerkships

"WBA Grade Bonus" is not calculated

"Weekly Req" represents completion progress towards required weekly average.

"Activity Req" represents progress towards the required number of WBAs per Activity.

2025-2026 Patient Care and 2026-2027 Required Explore & Focus Phase Clerkships

"WBA Grade Bonus" is calculated based on completion of Weekly WBA and Activity Req up to 2%.

"Weekly Req" represents completion progress of 2 WBAs per clerkship week

"Activity Req" represents progress towards 2 per activity per 12 week rotation and 1 per activity per clerkship for rotations less than 12 weeks in length.

Interactions

Button icons

Click on icons to get information, clear filters, link to contact, or return to a previous page.

Sorting

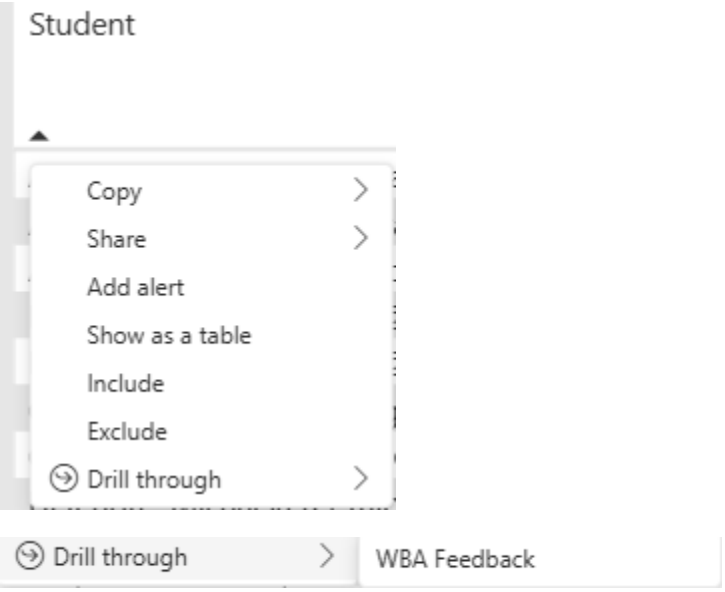

You can sort by any of the column's headers by hovering over the header until an small arrow appears and left clicking on the header.

Drill through

This function allows you to see more information about a particular student

To drill through, right click on the student you are interested in and select “Drill through” from the menu and then select the report you would like to view for that student.

To return to the original report use the  button.

Slicers

Slicers are filters that you can apply to narrow down the data available in the report view. In this report the slicers are located on the left-hand side of the report.

The report is designed to track current or recently ended rotations, if you want to look further back use the 

button before filtering to ensure you get the information you need.

Student:

A searchable like of students by full name, email or UW Net Id.

Select Rotation:

Current rotation – a clerkship rotation occurring now
Just ended – a clerkship rotation with a timeframe end date in the past 6 weeks (42 days)
Past rotation – a clerkship rotation with a timeframe end date greater than 6 weeks in the past

Course:

UW Course Number

Clinical Year:

Spring Quarter to Spring Quarter shown as “start year – end year”, i.e. 2026-2027

Rotation Quarter:

The quarter the course was assigned to based on its time frame label, except for Olympia LIC which is not based in academic quarters but takes place over 42 to 46 weeks.

Course Type:

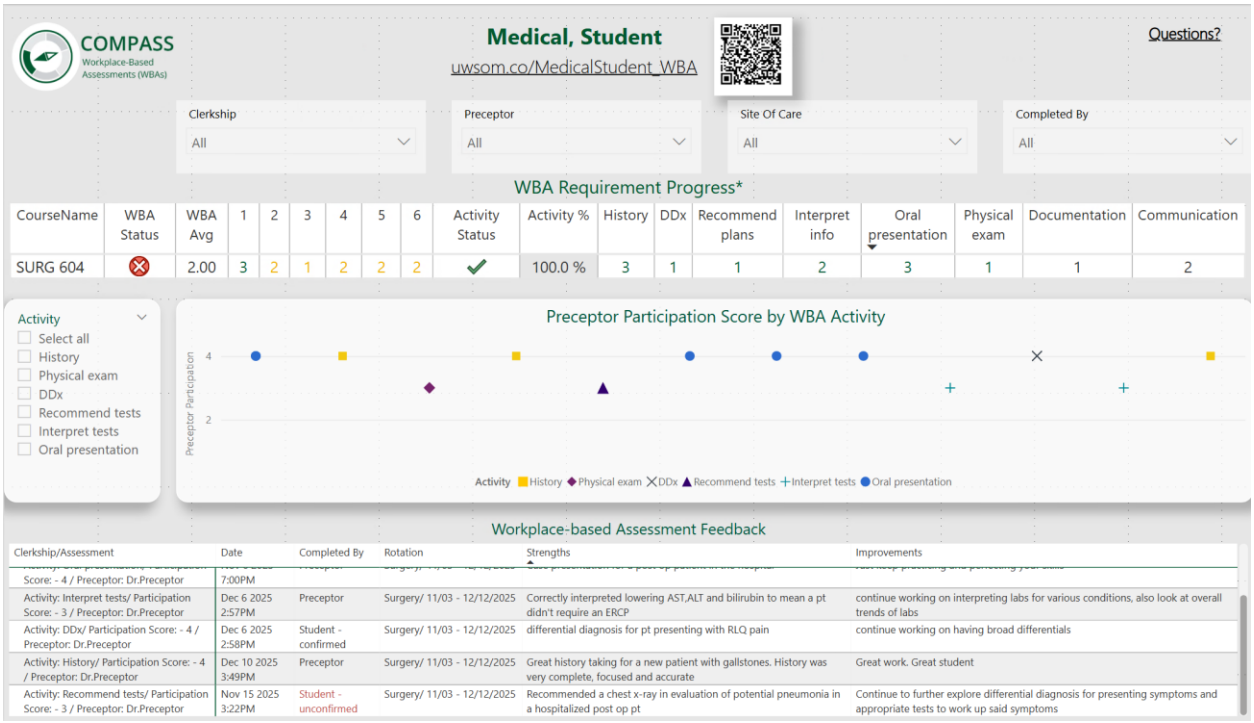

Standard, LIC (Olympia LIC), or WRITE

WBA Feedback Drill Through

Workplace-based Assessment Detail View

This view contains the preceptor participation scores along with the qualitative feedback from the WBA form submissions.

This view also shows progress over time by activity and preceptor participation.

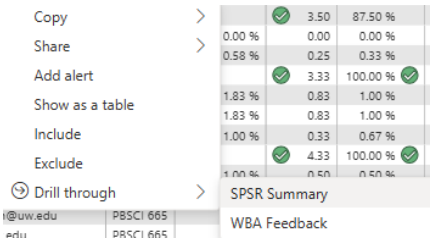

Note: This view has changed slightly before production, image will be updated after changes are completed.

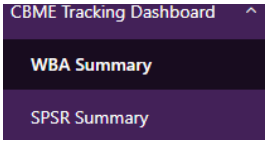

SPSR Summary and Drill through

The purpose of the SPSR summary is to track clerkship requirement completion and provide an easy summary for completing the Student Performance Submitted to Registrar (SPSR) evaluation form at the end of clerkship. This report is designed to view a single student at a time.

You can navigate to the new view via the drill through functionality by right clicking on a student name, navigating to Drill through on the menu and selecting SPSR Summary from the options.

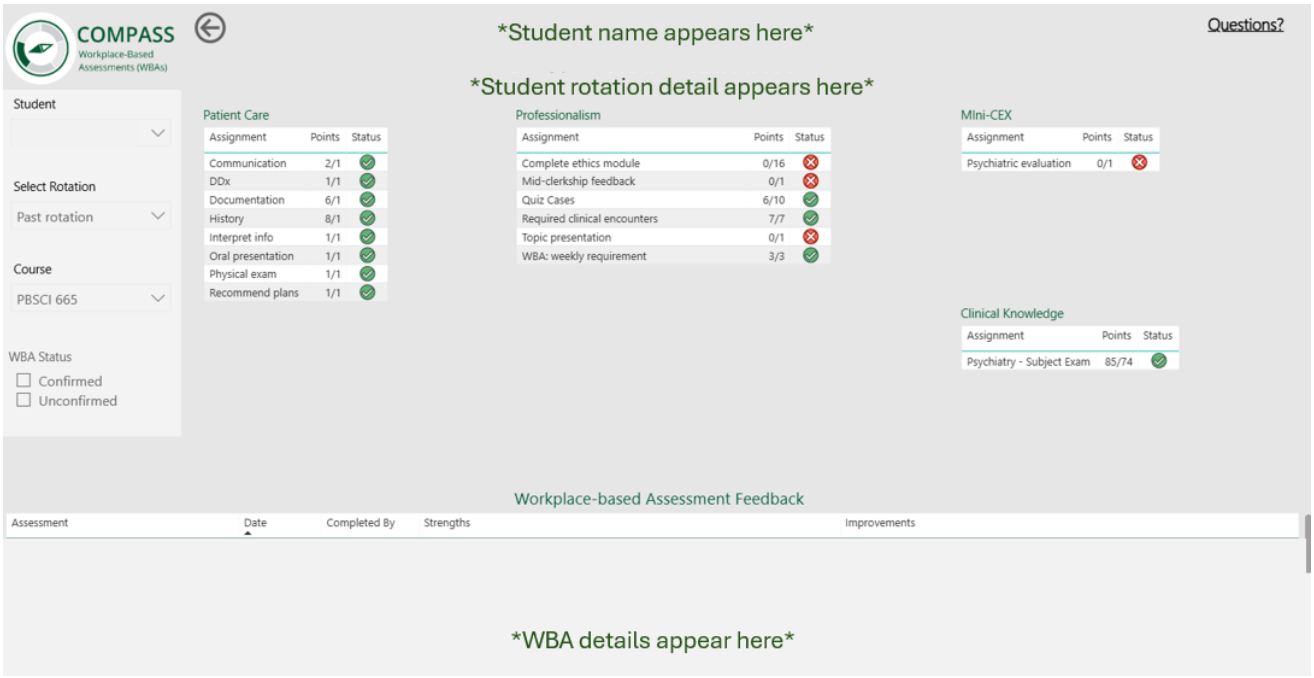

Or use the left-hand navigation menu to go directly to the report.

Note: if you navigate directly to the report you will need to use the slicers along the left-hand side to filter to the student(s) and rotations.

On the summary page you can view SPSR requirement completion status and progress as well as view the WBA comment feedback.

To return to the original report use the  button.
