Student Performance Dashboard

Author: Academic & Learning Technologies

Student Performance Dashboard

The Student Performance Dashboard is one-stop shopping for your key performance data. In addition to your own data, you can see how your performance compares to your class mean.

All of the information presented comes from other source system, primarily eValue and Canvas.

Data Load Expectations

In general, data is available in the Student Performance Dashboard on business day after it becomes available in eValue, Canvas, or another source system.

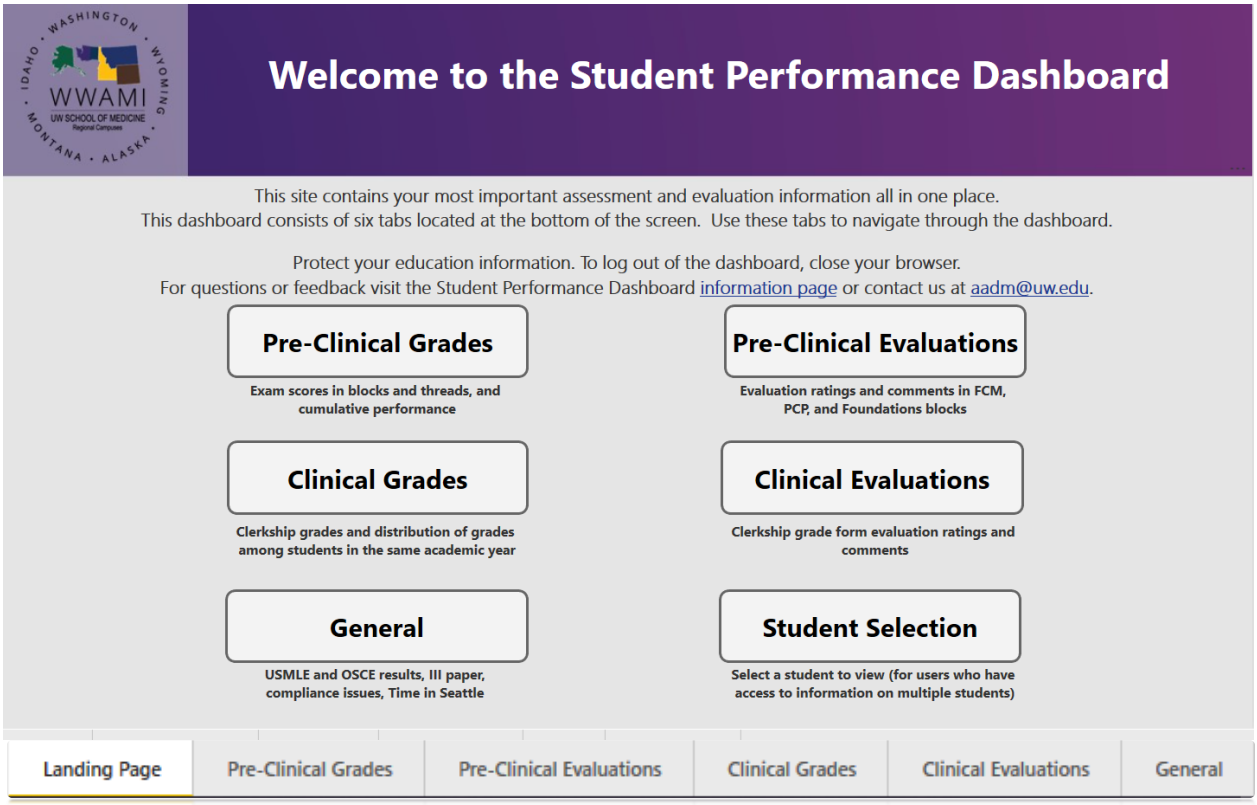

Who Else Has Access to My Information?

Access to your Student Performance Dashboard is available only to limited faculty and staff: the learning specialist at your site, your regional Foundations dean, your regional clinical dean (for students in clerkship tracks and WRITE), your College mentors, and appropriate deans and staff in Academic Affairs and Medical Education & Evaluation.

General Navigation

Information in the Student Performance Dashboard is broken into five different tabs: PRE-CLINICAL GRADES, PRE-CLINICAL EVALUATIONS, CLINICAL GRADES, CLINICAL EVALUATIONS, and GENERAL.

On the welcome screen, you will see a brief explanation of the dashboard and buttons leading to different reports. You may also navigate using the tabs along the bottom of the tool.

In several places, you will see a ⓘ icon. Clicking on that icon will give you an explanation of the data you are seeing in that section. Once clicked, the button will become a ↩ button to return to the data visual.

Note: the visualization tool is not optimized for mobile web browsers on mobile apps. *For example, some sections rely on a right-click, which is not available on mobile devices.*

Pre-Clinical Grades

This tab shows overall block and thread scores in the top pane, as well as the standard deviation difference from the mean of your cohort at all sites.

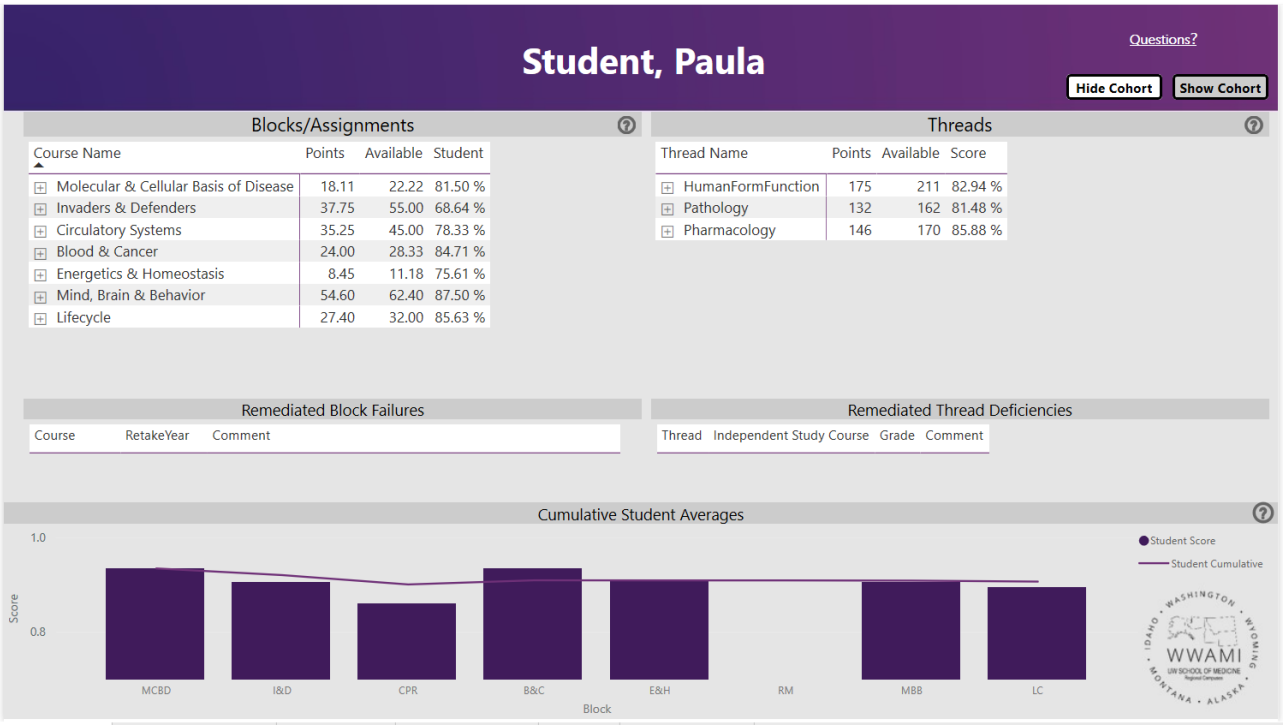

In the Block/Assignments section of the top pane, you can view detail (*right-click on block or thread and choose Drill Down)* on individual assignments/exams.

In the Threads section of the top pane, you can view detail for a break-down of Term 1, 2, and 3; then you can see a break-down of thread scores in each block. Block exam scores will be loaded after each exam; thread scores will be loaded upon completion of each block.

The Remediated section on the middle pane displays any block fails or thread deficiencies that have been recorded.

The Cumulative Student Averages section on the bottom pane, is a chart showing your cumulative difference from the mean in blocks to date.

- The first point represents the difference between your score in MCBD and the overall class mean.
- The second point represents the sum of your percentage scores in MCBD and I&D compared to the sum of the class means in those blocks.
- The remaining points follow the same pattern.

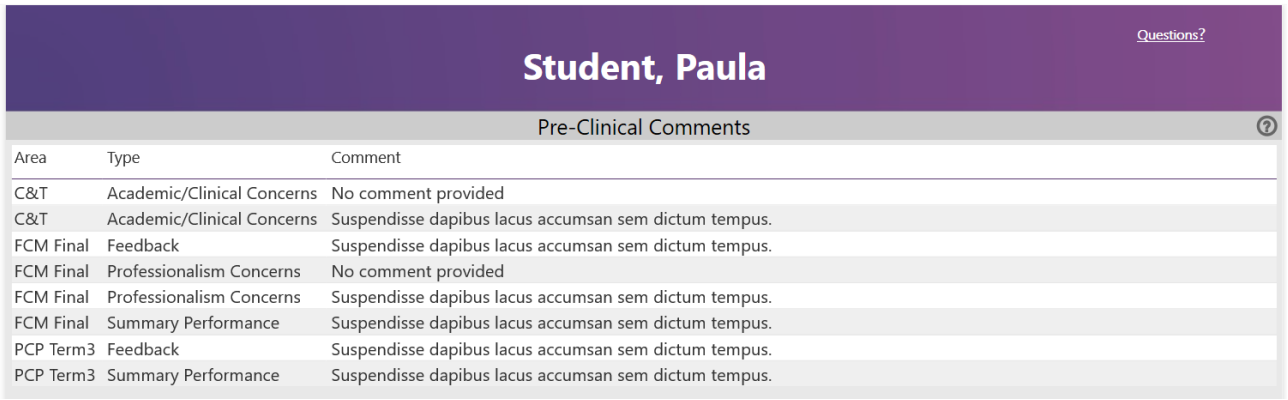

Pre-Clinical Evaluations

This tab shows the comments you received in evaluations during the Foundations phase.

"Area" indicates the block/course/activity in which the comment was made.

"Type" indicates if the comment was Summary Performance, Feedback, Professionalism Concerns, or Academic Concerns.

You can sort the table using the column headers, and you can hover your mouse over the comment to expand a pop-up box with the full text.

Questions?

Student, Paula

Pre-Clinical Comments

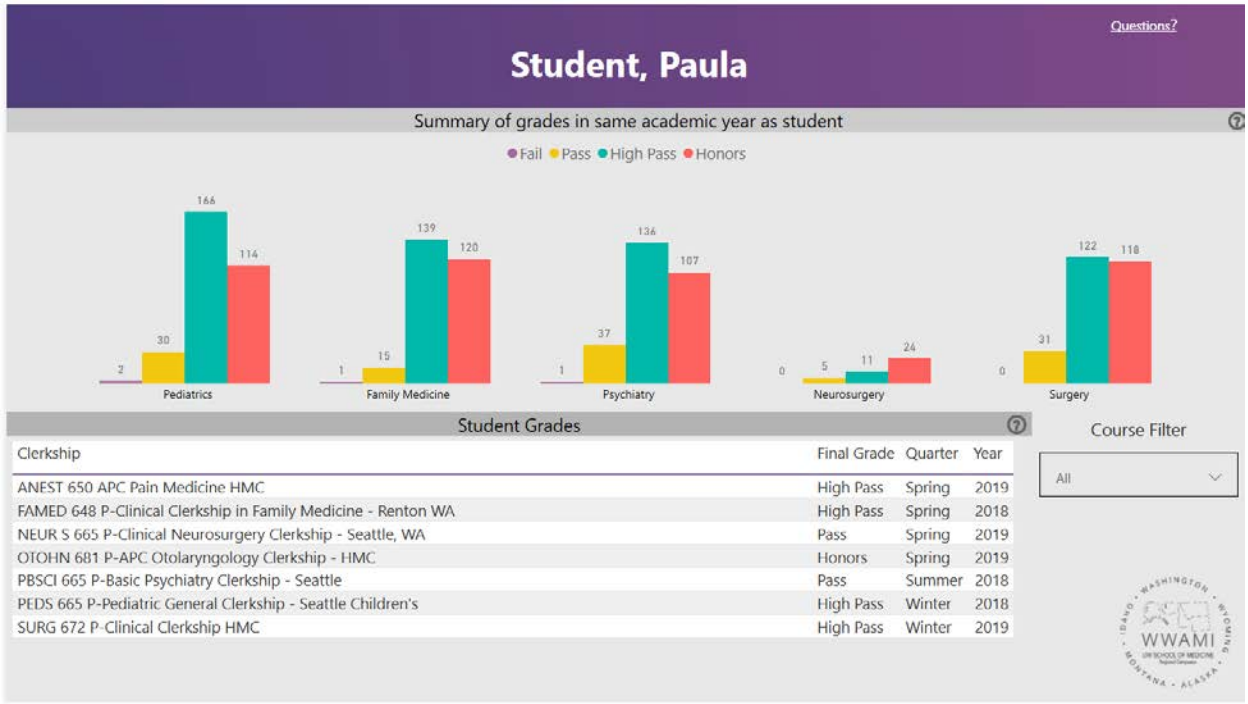

Area	Type	Comment
C&T	Academic/Clinical Concerns	No comment provided
C&T	Academic/Clinical Concerns	Suspendisse dapibus lacus accumsan sem dictum tempus.
FCM Final	Feedback	Suspendisse dapibus lacus accumsan sem dictum tempus.
FCM Final	Professionalism Concerns	No comment provided
FCM Final	Professionalism Concerns	Suspendisse dapibus lacus accumsan sem dictum tempus.
FCM Final	Summary Performance	Suspendisse dapibus lacus accumsan sem dictum tempus.
PCP Term3	Feedback	Suspendisse dapibus lacus accumsan sem dictum tempus.
PCP Term3	Summary Performance	Suspendisse dapibus lacus accumsan sem dictum tempus.

Clinical Grades

This tab shows the grades you received in evaluations during the Clinical phase.

The Student Grades table in the bottom pane shows the clerkships for which you have received a grade. The "Summary of grades…" chart in the top pane shows the distribution of grades in the academic year-to-date (*Summer-Spring*).

You can use the **COURSE FILTER** menu to choose between core required clerkships, Advanced Patient Care & Subinternship, and Clinical Electives. *This selection will refresh both the Student Grades table and the Summary of grades chart.*

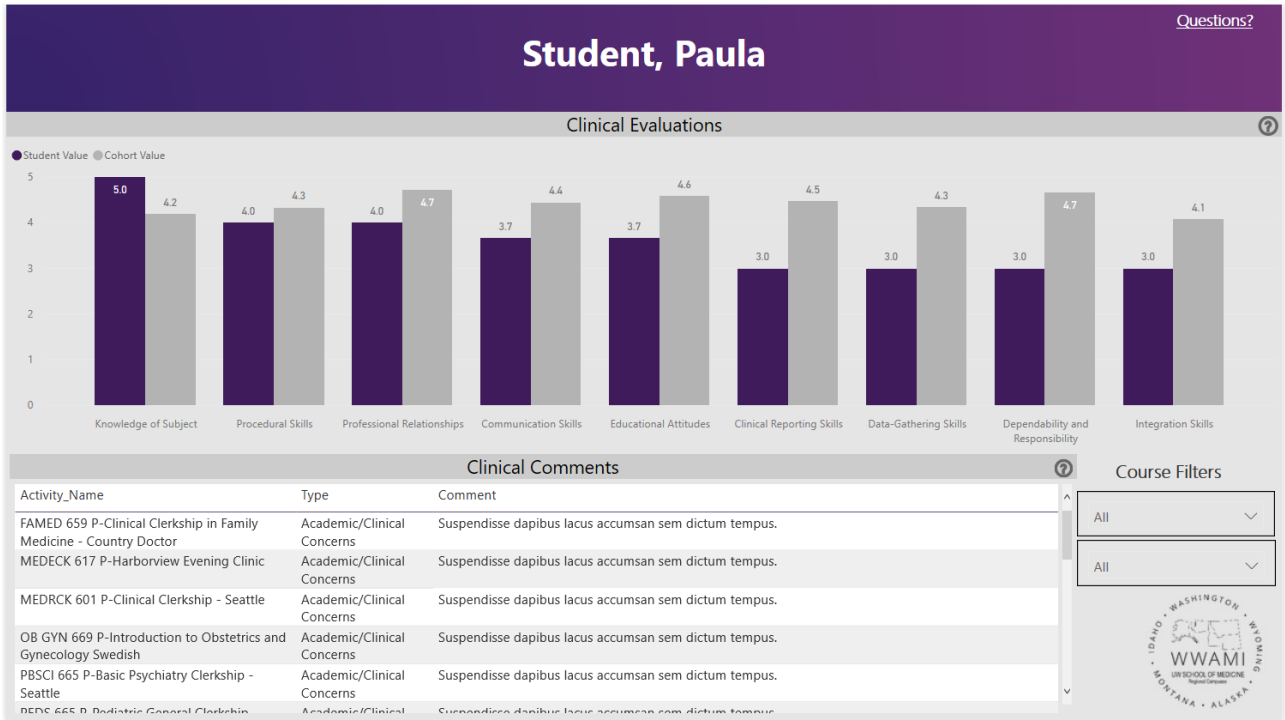

Clinical Evaluations

This tab shows the scores and comments you received on evaluations during the Clinical phase.

The Clinical Evaluations chart in the top pane shows your average rating on each item of the final grade form compared to the average of all students over the past two years. By default, the chart shows data from the core required clerkships only.

The Clinical Comments section in the bottom pane shows a table of comments you have received on your clerkship final grade forms. The Clerkship column indicates the course/site; the Type indicates if the question was Summative Performance, Feedback, Professionalism Concerns, or Clinical/Academic Concern. If the comment is truncated, you can hover your mouse over the comment to see a pop-up with the full text.

You can use the **COURSE FILTER** menu to change to the APC/Sub-I clerkships, or to view a single clerkship. *This selection will refresh both the Clinical Evaluations chart and the Clinical Comments table.*

General

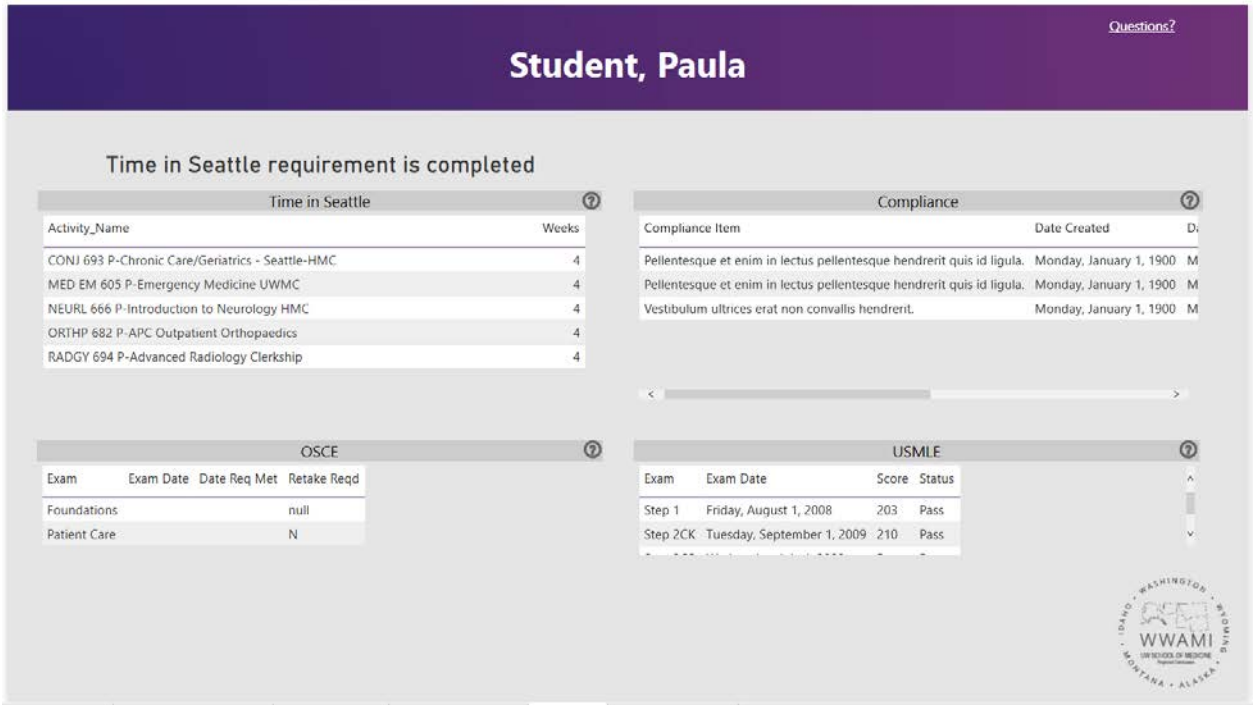

This tab is divided into four sections.

The Time in Seattle section indicates whether the requirement has been met, and which clerkships you took that count toward the requirement.

The Compliance section indicates any areas of non-compliance, such as immunizations, required trainings, etc.

The OSCE section indicates whether you were required to complete remediation for your OSCE exams.

The USMLE section displays your Step 1, Step 2CK, and Step 2CS exam scores and pass/fail status. Any retakes of these exams appear as additional rows in the table.

Where Can I Go For More Help?

If you need help interpreting the data you see in your dashboard or coming up with strategies for improvement, please contact your learning specialist, Foundations dean, or College mentor.

If you have problems accessing the Student Performance Dashboard, or if the data you see there does not match the information you see in other systems, please contact our Academic Affairs Data Mart support email: aadm@uw.edu.
